

EXPERIA™

THE ENHANCED SHOPPING EXPERIENCE

An enhanced shopping experience with discount offers and spot bargain coupons to visitors within range of point-of-sale

EXPERIA™ is the next generation shopping experience, wherein a person within the vicinity of a shopping mall, arcade, cinema, restaurant or any store/point-of-sale receives multiple discount offers or spot bargains in the form of coupons on his cellphone, sent from a device mounted within the premises. †

These discount ad coupons are customized and sent by mall owners on behalf of merchant shops within their premises for a nominal charge to the merchant per coupon sent. The merchant easily recovers and gets high returns on his ad spend even through a tiny incremental sale. The mall owner benefits through quick break-even followed by steady upward income and increased publicity of his venue as a popular shopping destination. The system can also be deployed by merchants within single store or stand-alone premises.

The coupons can be utilized by the shopper within a predefined period as well as passed on to others on their cellphones multiple times. If these passed-on coupons result in sales, the sender accumulates incentive points which can then be redeemed.

EXPERIA™ is a unique device that converts passers-by into visitors, visitors into customers, and customers into frequent and loyal patrons. Its all-round benefits result in increased business and turnover for vendors and merchant clients as well as an enhanced shopping experience for customers.

Location based bargains directly to cellphones of potential customers

SAMPLE COUPONS

Mounted device with antennas
